Our 6 month English programme aims to enhance English communication skills for medical and biomedical students and professionals.

It integrates medical and language learning for a contextual approach, preparing you for interactive, real-world healthcare applications.

Key features include:

- **Practical language use**
- **Confidence-building**
- **AI integration**
- **Alignment with the OET**

Taught by experts, it provides a solid foundation for success in global healthcare.

Why Choose Our Programme?

- **Combines** English instruction with medical topics for practical learning
- **Learn** English for use in real healthcare settings – communicating with patients, writing reports, and understanding research
- **Interactive** engagement with medical topics improves retention and application
- **Develop** medical knowledge and language skills simultaneously
- **Integrates** language learning with subject content for busy professionals.
- **Boost** confidence for international collaboration and conferences
- **Learn** to use generative AI tools in healthcare while maintaining human communication
- **Aligned** with the Occupational English Test (OET) for international medical recognition

What You'll Gain:

- **Enhanced Communication:** Improve interactions with global colleagues and patients
- **Access to Resources:** Stay updated with the latest research and materials in English
- **Cultural Competence:** Use English to bridge cultural gaps, improving patient care
- **Professional Development:** Participate in global conferences and seminars confidently
- **Career Advancement:** Unlock new opportunities in international healthcare

Develop the English skills you need to excel in healthcare. **Enrol today!**
